PROFESSIONAL EXPERIENCE

Research Assistant **Sept. 2020 - July 2021**
MD Anderson Cancer Center, Advisor: David Fuentes Houston, TX

- Developed novel, computationally efficient deep learning architectures for 3D medical image segmentation and classification
- Created Docker images for containerizing complex neuroimaging analysis pipelines, allowing the work of previous researchers to be easily integrated into ongoing and future projects
- Mentored two summer students through the Cancer Prevention & Research Institute of Texas (CPRIT)-CURE Summer Undergraduate Program

Information System Security Manager **Aug. 2016 - Aug. 2020**
U.S. Navy, USS Carl Vinson San Diego, CA

- Led a team of 9 highly talented cybersecurity analysts who oversaw the security and integrity of a $20,000,000 computer network consisting of roughly 4,000 assets with zero intrusions or major incidents
- Implemented a comprehensive network security program that resulted in the organization′s highest ever cybersecurity score when evaluated by external security auditors
- Received extensive training on computer and communication networks, cryptographic key management, and computer network defense
